About me:
A motivated, passionate software engineering graduate with six months of experience in software development. With a high-energy approach, well-developed skills in Agile methodology, and driven to create user-focused web applications. I have developed several web apps including Awwards and Rated using Django framework for Python.

PROJECTS

Personal Gallery

https://github.com/CalebKabaya/Image--Gallery-
A personal gallery application to display various photos by categories and locations from around the world.

Awwards

https://github.com/CalebKabaya/Awwards
Awwards is an application that allows developers to post their projects and see how other developers rate them.

News Bloom

https://github.com/CalebKabaya/News-Bloom
This is a news application that lists and previews news articles from various sources by consuming the news API.

Rated

https://github.com/CalebKabaya/Rated
Rated is a web platform where employees can be able to rate their company in terms of the work environment they provide.This approach gives job seekers and employers what they've asked for - the freshest perspective on what it's really like to work inside any company, according to employee reviews.
